RE: EUROPEAN UNION ENVIRONMENTAL LEGISLATION – ROHS2 DIRECTIVE

Keystone Steel & Wire Company certifies that the products that we supply are in compliance with “The Restriction of Hazardous Substances in Electrical and Electronic Equipment (RoHS2) Directive (2011/65/EU) including all amendments” initiated by the European Union (EU). This directive refers to materials used in electrical and electronic equipment and limits the content of specific harmful elements (i.e. lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB), and polybrominated diphenyl ethers (PBDE)). None of these chemicals or metals are purposefully added in the manufacturing of our steel wire products and, to the best of our knowledge all of the listed substances are below the maximum values allowed.

Please contact us if you have questions or require additional information.
